

## Q3 Startup Market Trends and Insights

July 2017

## Virtual Reality (VR) report outline

This report provides an overview of the VR technology sector and is broken down into three sections

#### **Sector Description**

High-level sector metrics, innovation quadrant, and category definitions

#### Trends & Insights

Infographics and data points for the virtual reality technology sector

#### **Quarterly Activity**

Major funding and exit events from the previous 90 days

Venture Scanner reports are built by analysts utilizing our startup database and research platform

**Sector Description** 

### VR technology startups are creating new businesses in 12 categories

## VIRTUAL REALITY

The full <u>Venture Scanner</u> market report and database tracks 699 companies with \$6.5B in funding

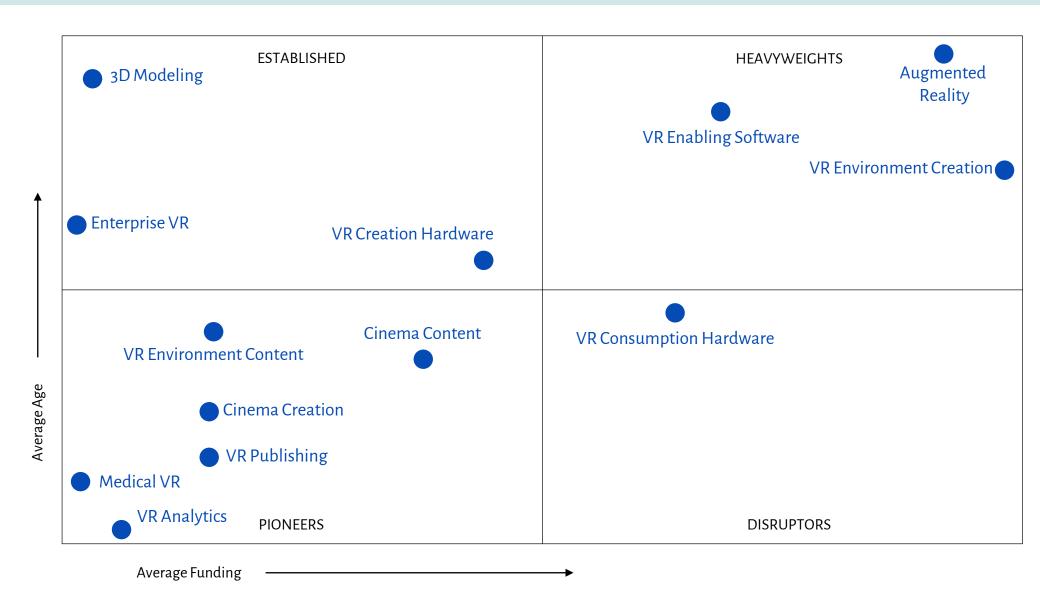

## Innovation quadrant for VR

## VR startups play in many different categories (1 of 2)

#### 3D Modeling

51 Startups, \$156M Total Funding Companies that enable users to capture and render objects in 3D

#### Medical/Health Virtual Reality

48 Startups, \$81M Total Funding Companies that utilize VR for medical purposes, including fitness simulations and meditation spaces

#### Virtual Cinema Content

111 Startups, \$693M Total Funding Companies that sell professional-quality VR films and videos to be viewed by customers

#### Virtual Environment Content

272 Startups, \$1B Total Funding Companies that sell VR environments for a user to experience, such as video games and classrooms

#### **Enterprise Virtual Reality**

102 Startups, \$148M Total Funding Companies that utilize VR for business purposes, including virtual work rooms and data visualizations

#### Virtual Augmented Reality

124 Startups, \$2B Total Funding Companies that create augmented reality solutions, such as social games that interact with the real world
